Profitably

The Paradox Of Generosity

**By Christian Smith And
Hilary Davidson**

The Paradox Of Generosity: Giving We Receive, Grasping We Lose takes an informative deep-dive into the general ideas surrounding generosity. It dabbles in the belief that people who give more are usually happier, but regardless of these common perceptions, people are still often reluctant to be generous. Co-authors Christian Smith and Hilary Davidson use plenty of research from various sources in their analysis and keep it interesting by making it relatable to a wide group of readers. If you're looking to read an educational approach on the idea of generosity – and why people fail to be generous when the benefits are evident – this is a must-read.

Don't Let Hackers Ruin Your Holidays

December 2021

This monthly publication is provided courtesy of Holly Fullingim CEO of Quick Compute.

Our Mission:

To make YOU the technology HERO of your organization with excellent technical support, awesome customer service and great products which create a digitally safe & productive work environment.

Online shopping has become more popular than ever before. In 2020, more than 2 billion people bought products or services online. Whether they're shopping online because it's more convenient or they're avoiding going to brick-and-mortar retailers during the ongoing pandemic, more people are turning to online retailers every day.

It's not just the convenience or health safety that's drawing people to shop online; shopping this way has become more secure than ever before. That doesn't mean all retail websites are created equal when it comes to safety and security. Hackers and scammers are still out there trying to get your information, but by taking the proper precautions, you have no reason to worry while shopping digitally.

If you plan on buying online this holiday season, here are five tips to ensure your information stays protected.

Use Well-Known And Secure Sites

When looking to purchase a product or service online, you have thousands of options to choose from. To avoid having your personal information stolen, it's best to use familiar sites such as Amazon, Walmart or any of the other major retailers. If you search for a product on a search engine, you may be presented with prices that are extremely low. There's a good chance these are not trustworthy sites. When it comes to online shopping, if it seems too good to be true, something is wrong.

Continued on Page 2 ...

... continued from Cover

Pay attention to the security of the site where you're trying to make a purchase. Look for a lock icon in the browser bar. If the website has one, then you should be safe on their site. Another way to tell is by looking at the beginning of the web address. If it begins with "https" instead of "http," you are in good shape, and you can continue using the site. Secure websites help protect your financial information as well as passwords. Shopping at unsecured sites can put your personal information at risk.

Create Stronger Passwords

A strong password can make all the difference between your information remaining secure and someone stealing it. You need to make

your passwords as difficult as possible so that hackers and thieves can't hack into your accounts. It's best to use a complex mix of uppercase and lowercase letters while including special characters and numbers. Avoid using common spellings of words and personal information in your passwords because these can be easier to crack.

If you're worried about not remembering a complex password, use a password manager. This tool will remember the passwords for your accounts while also keeping them protected. Utilizing password managers is the best way to create complex passwords since you won't have to personally remember them, and they will still be protected.

Keep Track Of Your Statements

You should always be watching your finances, but it becomes even more important when shopping online. It's a good habit to form and will help you catch overcharges or purchases that you did not make. It's also a good idea to only shop with a credit card when shopping online. If someone hacks into your account and steals your debit card information, they will have direct access to your money. Most credit cards have protections in place for fraud, so you won't be at fault for any errant charges on your account.

Protect Your Information

When entering a new website, you should be wary if they ask for any personal information upfront. No online retailer should ever ask for your Social Security number unless you are applying for a credit card on their site. Be cautious if they ask for your birthday as well. Hackers can use this information in conjunction with your credit card number to wreak havoc on your life.

Don't Shop On Public WiFi

While it might seem like a good way to keep yourself entertained while enjoying a coffee at a local café, shopping on public WiFi can leave you at risk of being hacked. Public WiFi is often not very secure, and entering your personal information while using it can give hackers easy access. It's much safer to bookmark the item and wait until you're home or no longer using WiFi to make the purchase.

Shopping online can be as safe and reliable as shopping in a store – as long as you take the proper precautions. Take some time to ensure that you are following the right security measures before making purchasing or entering any information.

Cartoon Of The Month

"I do all of my holiday shopping online."

SHINY NEW GADGET OF THE MONTH

Travelmate Robotics

Tired of the usual, old-fashioned luggage? Travelmate Robotics is trying to change the luggage game. With these suitcases, you never have to worry about the safety of your items. It comes standard with a secure Bluetooth-enabled lock and GPS tracking if your bag ever goes missing. The suitcase also comes with a scale so you'll never have to worry about overpacking.

The best part? The suitcase is entirely autonomous and will follow you around through a Bluetooth connection.

The "Follow Me" function as well as the obstacle avoidance system sets Travelmate Robotics ahead of the competition. It's the ideal suitcase for any businessperson or frequent flyer.

The Golden Question

When we make a big decision, we usually focus on the immediate outcome rather than how it will affect the future. The golden question is actually a five-part question that everyone should consider before making any potentially life-changing decision. It starts by asking yourself, "How would I feel about this in a day? In a week? How about a month? Or a year? Or even five years?"

Using this mindset to help make decisions is a good way to avoid any future regrets. Oftentimes, we use emotions to help decide on these major choices instead of looking at them logically.

If you use the golden question while thinking about your choices, you're bound to choose what is best for you.

When To Cut People From Your Team

Not long ago, I had a subscriber reach out to me with a challenging question. This person's business had made many changes due to COVID-19 and the economy. They wondered when they should begin cutting people from their team. To explain my views on the matter, I like to turn to a story from the Bible.

A man named Gideon was selected by God to lead the Israelites and free the people of Israel from those who were worshipping idols. Gideon gathered 32,000 men from four tribes in an effort to defeat the Midianites. After Gideon had gathered the troops, God came to him and informed him that he had gathered too many soldiers.

When Gideon asked what he should do, God said he should give a rousing speech to the 32,000 troops, but he should end the speech by saying, "Now that we're off to fight ... if there's anybody here who's afraid and you think we're about to lose this upcoming battle with the Midianites, you can be excused at this time. Go home, we can't use you this time." When Gideon gave this speech, 22,000 members of his army decided to call it quits.

This is an important story to consider when trying to decide if you need to make cuts to your team. When you are recruiting, it's hard to get an idea of how someone will actually turn out. You're bound to make some wrong hires who don't appreciate what you are trying to do. If someone does not believe in the cause, they do not deserve a spot on your team.

God came to Gideon after he relieved the 22,000 soldiers from service and told

him he still had too many soldiers. Gideon was instructed to march his troops until they were hot, thirsty and tired before bringing them to the river. Gideon did just that, and when they arrived at the river, 9,700 of his troops dropped their shields and spears before jumping into the water. Gideon then excused those troops and was left with 300.

Gideon took his 300 troops and led them to attack the Midianite camp when night fell. By using a strong strategy and the might of his small – but dedicated – team, Gideon sent the Midianite army fleeing in terror.

I am a big believer in creating a small but dynamic team. By recruiting the right people, you have a better chance of success. The more difficult part of leadership is letting go of those people who are too afraid or negative and replacing them with suitable candidates. It might not be easy, but it is necessary.

While Darren Hardy was growing up, his father always told him to be the exception. He has taken this philosophy and applied it to his many pursuits in the world of business. Darren has remained at the forefront of success media for over 25 years and is not stopping anytime soon.
